More Industries Needed!

ND because more industries are needed this page in the News is addressed to the stranger in other states. The News finds its way to the congested centers of the East, and it is to the manufacturers of the East that we are turning in an effort to arouse them to the wonderful opportunities awaiting them in God's great outdoors in Oklahoma, the most lavishly blessed state in the Union for natural resources and opportunities.

We need cotton mills; shoe factories; shirt and overall factories; harness factories; packing houses; smelters, and a dozen and one other factories and industrial institutions that appreciate being close to the raw material, appreciate the advantages of natural gas at cheap rates for fuel, and where labor can be had at reasonable rates.

Why not leave the maddening throngs of the congested centers? Why not come where the turmoil and strife of labor wars are unknown? Why not get in touch with the wide, wide world, where people breathe easy and enjoy the bounties of life as God intended they should?

Ada has factory sites to give away to the right kind of industries; we have propositions to offer men in every line of business and in all walks of life; we welcome competition, rather than fear it, and the latch string is always on the outside.

Ada has a Lions' Club and a live Chamber of Commerce with a paid secretary, whose duty it is to inform you of all the facts you would naturally like to have were you seeking a new location. If you want more information about this city, county and state, write the secretary, Mr. O. N. Walker, and the information will be forthcoming. Do it today, lest you forget!

"Peace Hath Her Victories No Less Renowned Than War" ---

OUR VICTORY IN WAR!

The gloom that settled down upon the civilized world in July, 1914, when the Imperial German Government defied the world and started a holocaust whose flames lighted every nation and kingdom upon the face of the earth has cleared away.

For more than four long years the Tri-color, the British Jack and the Stars and Stripes have floated side by side in the most titanic struggle the pen of the historian will ever be uses to describe.

That alliance as a nucleus brought together the best manhood of the race in a struggle to the death against civilization's avowed and most fiendish foe. The rich and the poor, the peasant and the king, the mediocres and the scintillating geniuses of every nation involved sacrificed their all upon the altar of the war god and died in the trenches together.

From the opening of the conflict this great nation of ours poured out her money like Vesuvius emits her lava; when it was seen that the crucial test was at hand and world civilization was tottering in the balances, she joined the forces who believe in right against those who believe in nothing but might; an industrial, peaceful nation was turned into an unequalled fighting machine over night; before the enemy knew what we were about hundreds of thousands of khaki clad fighting men were forcing their way through the shell torn frontiers of France, anxious to take a hand in the fray. What they did when they reached their destination is known to every student of history in the making.

The fight was won; the tocsin of victory was sounded and will reverberate all down the ages. Those who survived that awful struggle are now returning to the land of their sires, to their families and their fires, and to them we owe a debt of gratitude which we can never repay.

At last the world is at peace. It must now get back to work. Let us hope that the peace will be everlasting, and the work pleasant. Let us start now on the basis of peace on earth and good will toward all men, and on that basis fashion a civilization that will endure forever.

OUT OF DEVASTATION RISES

OUR VICTORY IN PEACE!

In speaking of our victory in peace we really mean "our" victory—the victory this bank is achieving. When the present officers took hold of this bank with the determination to resurrect it from the junk heap, wise and able bankers looked at us over their specks and said it couldn't be done; that we were only chasing a glow-worm whose faint-glimmering light would lure us on to the rocks of financial destruction. But we refused, unlike Ulysses, to be strapped to the mast and sail on past the beckoning hand of Opportunity. Spurred on by our desire to establish ourselves in the banking business in Oklahoma's most thriving little city and make for ourselves homes among the most congenial people we have ever known, we heeded what wiser men deemed only the siren song of Ambition, and played our money on the Guaranty State

Months have passed; spring has come and gone, and with the golden summer has come a crop the equal of which this county has never enjoyed. And this bank has helped to make a portion of this crop. That is, we have financed many farmers for this year's operations, and they are making good. The fact is, we like to finance people who are inclined along the "make good" lines.

Not many moons ago this bank had puny little deposits aggregating \$60,000.00. Watch our next statement-then you'll understand why we speak of "our victory in peace." We will show deposits equal to any banking institution when there were only three banks in Ada.

The policy of the Guaranty State Bank is to tie up only with GOOD MEN who need money. And in spite of whatever collateral the borrower may have to put up, the moral side of the man is considered the real security. In other words, this is a bank whose intention is to help a man to cash in on his moral character and realize the good fruits of a well-

FRIENDS AND PATRONS: The statements I have made

show you that some of my troubles result from the demand of ice delivery in such small quantities, that the price we get does not pay for the service-you want your ice delivered by noon, which means that we must have enough delivery outfits to cover the entire city in the forenoon, thus doubling the quantity that would be needed if the deliveries were distributed throughout the day, and doubling the cost of service.

The Government Food Administration, after investigating these matters, recommended the elimination of number of wasteful methods in order to avoid the necessity of increasing the price of ice, especially to working people and small consumers. These recommendations will work to your benefit, and among them .

That ice be distributed upon coupons to all customers as nearly as possible.

That a large part of the small sales be made from local ice boxes, or at the wagon instead of attempting delivery into houses.

These rules enable them to maintain service, and give good values, and benefits the customer, and are based upon years of experience of the people in the industry.

Also, special deliveries to residences which cost always more than the amount realized from the sare are entirely discontinued except in case of sickness.

This is the help we ask of you now: namely, BUY COU-PONS, and for minimum quantities of 25 pounds—as much 1 6-14-tf more as you can afford.
